e-business is not only about exchange of electronic documents!

Obviously much more is required: first of all, you should know business processes, typical for individual business activity, you should assure correctness of electronic forms, data quality, synchronization of electronic process within the entire chain of business partners and the appropriate storage of all these contents!

With more than 10 years of experience of the group of companies Panteon Group® is the leading provider of solutions intended for updates and support of processes in the area of supply, logistics and transportation with electronic business operations within Slovenia and beyond. With our partner GS1 eXite® and as its franchise for the area of countries Slovenia, Croatia, Bosnia and Herzegovina, Serbia, Montenegro and Macedonia, we are covering almost the whole southeastern part of Europe. By the help of other business partners we are reaching with our solutions the whole world!
